REFINED FOR ANY ROOM

HIGH-GLOSS FINISHES

Every Pendleton safe can be custom built with any of the colors listed on page 5. We also match any reproducible color in high-gloss finishes. Our high-gloss finish is a five day process that consists of a base and clear coat PPG automobile show car finish that is wet sanded and buffed with 1000 to 3000 grit sandpaper for a mirror reflection.

As a World & National champion competitive shooter, my firearms are my most valuable assets. I needed to keep them secure in a safe I could trust. That's why I called Pendleton Safes, and they built me a custom luxury safe for my most prized possessions. I put my guns and my trust in Pendleton Safes!

Jessie Harrison
World Champion Pistol Shooter

STEP ONE - CHOOSE A LEVEL

Levels are available in Bishop, Knight, or King Series. Each level features a unique look and feel with the same Pendleton standard of quality and security.

ANTIQUE COPPER TEXTURE

LEVEL 1

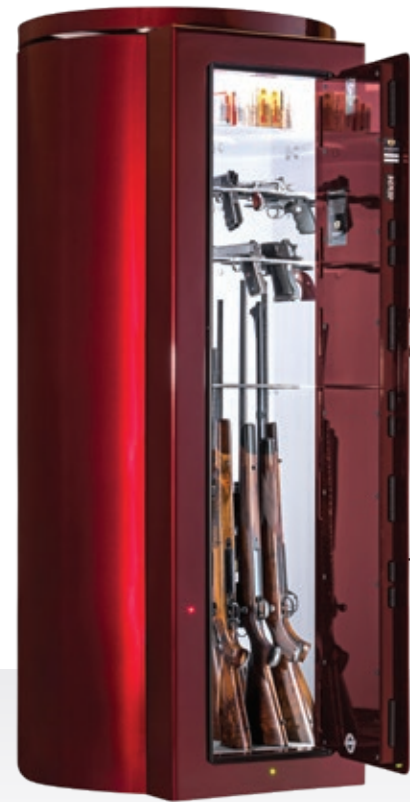

Includes revolving inner shelving, automatic lighting, and moisture control.

BLACK TEXTURE

LEVEL 2

Adds bright white interior, revolving outer shelf, and motorized rotation.

BURGUNDY GLOSS

LEVEL 3

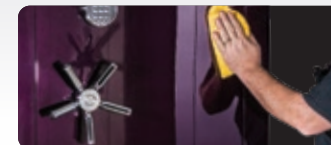

Adds "show car" quality automotive PPG paint finish.

ORDERING PROCESS

- STEP ONE**
Pick your level. **SAME QUALITY, DIFFERENT APPEARANCE.**
- STEP TWO**
Pick your Series. **KING KNIGHT BISHOP**
- STEP THREE**
Place deposit to schedule production.
- STEP FOUR**
Configure your safe. You can pick from available configuration layouts. See pages 20-24 for examples. **OR** take advantage of the specialized configuration service included with all orders. Send us basic information and we will maximize the design.
- STEP FIVE**
Make it yours. Personalized logo? Custom appearance? Other?

MAKE IT A PAIR

A PERFECT MATCH

Take your existing Knight Series safe and make it a matched pair. Whether you want to add to your firearms collection, store jewelry and valuables, or do a little of both – a matched pair safe is the perfect complement to your existing Pendleton or management solution for your extensive collection. Opposing doors open from the center, so they never touch. You'll enjoy full access to both units – putting your entire collection at your fingertips.

LOYAL BLUE GLOSS
Shown with optional features

The Bishop Series offers remarkable storage efficiency and reduced overall height, making it perfect for smaller areas or people who prefer a lower profile. Its wide-access door and corner storage shelving make organizing and accessing your collection easier than ever.

WEIGHT: **1000 LBS.***

* Weight varies based on shelving configuration and options.

FITS THROUGH STANDARD DOORS

At 29¾ inches wide, the Rook fits through standard 30 inch doorways.

TRADITIONAL LAYOUT

The traditional configuration is a perfect choice for most collections due to its ability to store over 90 handguns plus 40 shotguns or 30 scoped bolt action rifles. You can choose any combination of handgun or valuables storage shelving to customize it to your individual needs.

TAC-75 LAYOUT

TAC-75 has proven to be an excellent tactical firearm storage solution. With fully adjustable shelving, customize your TAC-75 safe interior to hold a vast array of tactical firearms, including .50 BMGs, SBRs and traditional rifles. See page 22 for a detailed look at the TAC-75 layout.

HANDGUN LAYOUT

Do you have an extensive and varied handgun collection? Pendleton can configure your safe to comfortably hold up to 300 handguns. We can also swap out handgun shelves with storage shelves for your important valuables.

COLLECTOR'S LAYOUT

Pendleton's combination shaft option allows for incredible storage versatility. Customize specifically for your collection. See page 24 for an example dedicated to jewelry and valuables storage.

- Custom built for your needs
- Can be configured to hold 250 handguns
- Fast and easy access

SECURITY AND FEATURES

It's what's inside a Pendleton Safe that places it among the finest in the industry when it comes to theft prevention and security. The following features operate behind the scenes to help fortify your valuables in the event of an attempted break-in.

STRICTER TOLERANCES / PRECISION-ENGINEERED

Pendleton doesn't cut corners. We use leading-edge techniques to design and manufacture purpose-built parts and components from raw materials. This costly process ensures the tightest tolerances, smallest door gaps, and highest, most consistent level of quality in each and every safe. The competition simply doesn't stack up.

SPECIALLY DESIGNED BALL-BEARING HARD PLATE

Pendleton's specially designed hard-plate prevents drilling out of the lock and protects the relocking mechanism from tampering.

SOLID 1/4" STEEL TOP AND BOTTOM

Burglars will often turn a safe upside down, exposing a vulnerable area on the bottom of a safe. All Pendleton Safe tops and bottoms are manufactured with solid high-strength, low-alloy steel.

CAM SYSTEM PREVENTS BOLT TAMPERING

All bolts operate on an innovative cam system that prevents tampering. If pushed on, these bolts push back, making it impossible to retract the bolts by force.

REINFORCED DOOR FRAME

The entire door frame of each Pendleton Safe is reinforced with structural steel angle to defend against pry bar attacks. You can rest assured that your valuables are protected by a Pendleton. No one else offers security on our level.

ADJUSTABLE HINGES FOR PRECISE FIT

Hinges are adjustable up, down, left and right for the most precise door fit available.

PRE-DRILLED FLOOR BOLTS

All Pendleton Safes are pre-drilled for floor bolts, adding an extra layer of security and peace of mind.

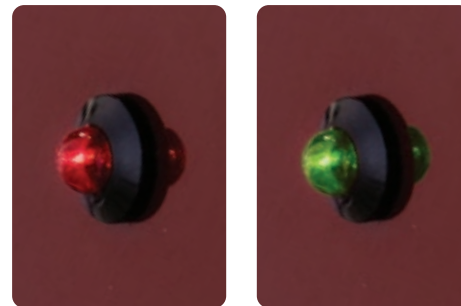

MACHINED FAIL-SAFE DOOR HANDLES

Pendleton's handles utilize a fail-safe system to prevent forced entry. A pressure-sensitive mechanism causes the handle to shear off if a break-in is attempted preventing further tampering.

EMP-RESISTANT PREMIUM S&G LOCKS

A world leader with 150 years of experience in locking systems for safes and vaults, Sargent and Greenleaf locks meet strict national and international security standards.

INDICATOR LED LIGHTS

A red LED light (available on any safe with an electronic lock) alerts you when your safe has been left ajar, while the green LED lets you know moisture control features are functioning.

PERSONALIZED NAME PLATES

Pendleton offers personalized, laser-cut, steel name plates.

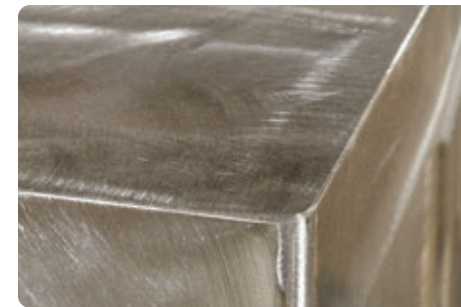

CHROME ACCENTS

Chrome accents is available on all Pendleton Safes.

REVOLVING EXTERNAL STORAGE SHELF

A revolving external shelf for storing calls, ammo and other gear. Control the rotation easily with the press of a button!

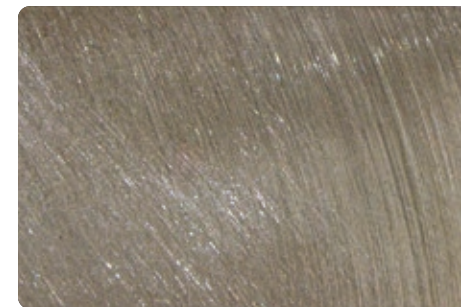

100% FULLY-WELDED SEAMS

Whereas some safe manufacturers use chain welding, Pendleton King Series Safes feature fully-welded and smooth-ground seams for the highest level of security.

PRECISION LASER-CUT DOOR GAPS

All Pendleton door gaps are laser cut to precise tolerances, making Pendleton safes nearly impervious to traditional pry-bar attacks. This exclusive security feature is only available from Pendleton.

SOLID HIGH-STRENGTH LOW-ALLOY STEEL EXTERIOR

Each Pendleton Safe exterior is built with solid high-strength, low-alloy steel in either 3/16" or 1/4" thickness.

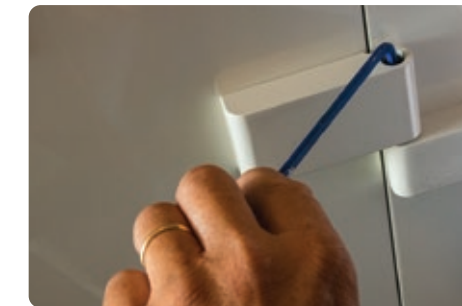

EXCLUSIVE REINFORCED STRIKER BARS

Where the competition's round bolts simply rest behind the face of the door frame, Pendleton's exclusive plate bolts enter into a reinforced steel striker system for superior break-in resistance. Combined with the tightest tolerances and laser-cut door gaps, these safes are virtually impossible to pry open.

PLATE-BOLT DESIGN 5X THE PROTECTION

Pendleton's unique plate-bolt design provides over 50 inches of solid steel locking surface area. That's approximately 5X more break-in resistance compared to the competition's traditional round-bolt design.

ADJUSTABLE HINGES FOR PRECISE FIT

Pendleton's fully-adjustable hinges are manufactured to the highest security specifications, enabling the most precise door fit available, for unsurpassed pry-bar resistance.

OFFICIAL UL LISTED SECURITY STATUS

Underwriters Laboratories is a global independent safety science company with more than a century of expertise in testing consumer and commercial products for safety and effectiveness.

LUXURY FEATURES AT AFFORDABLE PRICES

Revolution Safes' Revolving Gun Systems are the most functional, innovative and best-value, period. Using Pendleton Revolution Technology® and practical inside-door shelving, Revolution Safes are built to fit, manage and secure a wide range of firearms. With a spin of the turret, any long gun is front and center, helping to prevent unnecessary bangs, scratches and dents. Revolution Safes are the best value in gun-management and security.
